## NEWSLETTER

Week of January 17, 2022

Dr. Stephen Ferraro  
Principal

Phone: (201) 994-1830

### Upcoming Events:

**February 21st-25th - No School -  
Mid Winter Recess**

### Ms. Garcia and Ms. Husti

Our classes have been very busy, this snowy, wintery January. We have been learning and practicing our self-help skills of dressing and naming our winter clothing. The children learned about Dr. Martin Luther King Jr., and we talked about how he was "A Man of Peace." We also talked about and listened to how they can help to change

the world to be a better place. We continue to work on the alphabet letters, and our numbers. Please continue to reinforce these skills at home. Stay warm, and don't forget to snuggle up and read stories to your children. This promotes better literacy skills. 😊

## Ms. Lane and Ms. Sinclair

Happy New Year! We hope everyone is staying healthy, and enjoying the beginning of 2022. The Kindergarteners started off their year setting goals for themselves, and we cannot wait to see all they will be able to accomplish. They are working on their ending sounds, writing stories with labels, and they

love listening to our read alouds for ELA. In Math, we are continuing to work on counting and comparing numbers. They are also really enjoying our mystery Science lessons, STEM activities, and learning about Dr. Martin Luther King Jr., in Social Studies. We have already had a very busy start to our year, and look forward to all the learning we will continue to do!

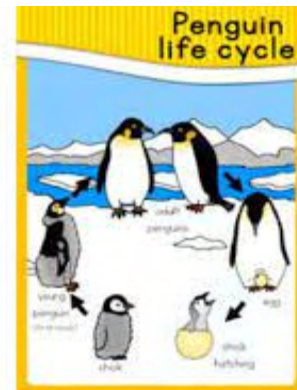

## Mrs. Bush

Happy New Year! This month we are learning all about penguins! We have learned where they live, what they eat, and the life cycle of a penguin. We really enjoyed watching live cams of penguins at zoos all

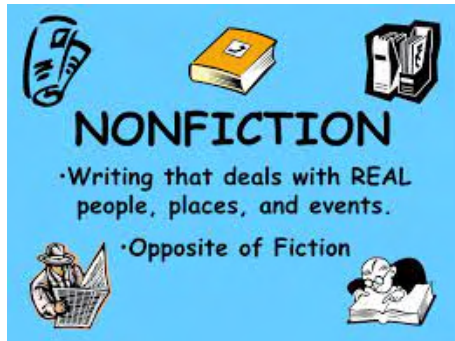

over the United States! We also continue to practice our Math and Reading skills!

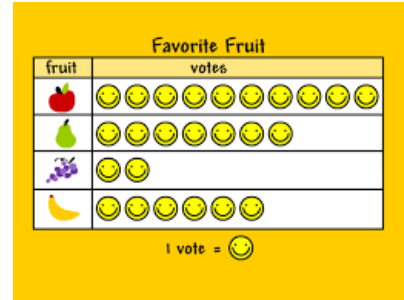

## Mrs. Davis and Ms. Rapp

In Reading, we are continuing our non-fiction unit. Students are reading non-fiction books, and writing facts about the topic. In Writing, we are working on “How To” writing pieces. The children are doing a nice job using the transition words in their writing. In Math, the students are learning how to gather and interpret data using

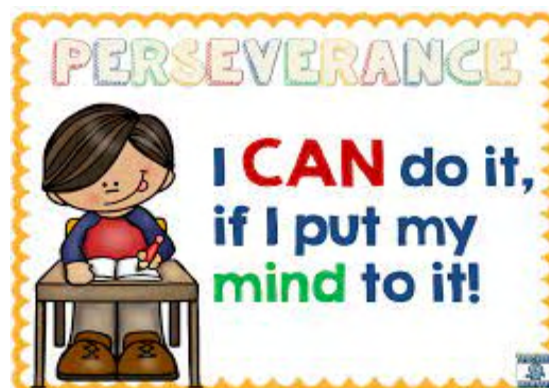

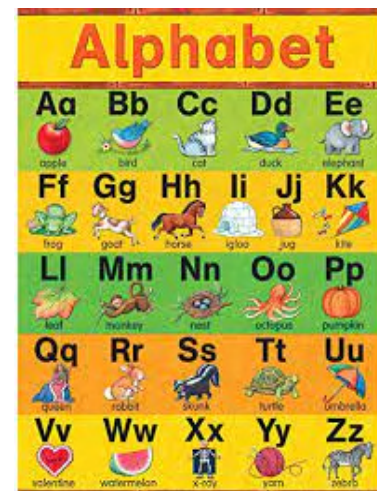

tally marks and picture graphs. Please read each night and practice Math facts.

## Mrs. Capazzi

Mrs. Capazzi's students are already halfway through the alphabet! They have been practicing identifying the letters by name, sound, and learning the correct letter formation. The students are learning to read, make, count, and write numbers

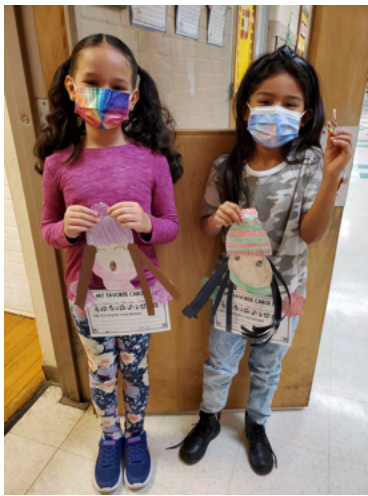

to 20, in Math. They loved learning all about Dr. Martin Luther King Jr., this month! Please remember to make sure Chromebooks are charged each night. Enjoy the weekend!

## Ms. Manzo and Mrs. Olivieri

Our Second Graders are awesome! They are working so hard, and we are proud of their many accomplishments and academic progress. Math continues to focus around subtraction, learning to borrow, and regrouping to find the difference. We continue to practice Math facts, and are strengthening our fact recall automaticity! Upcoming Reading and Writing units will be non-fiction focused. We will be reading and discussing facts vs. opinions, as well as identifying key features of non-fiction text.

Writing projects will be driven by details. Students will create writing pieces, where they are "experts" on a topic, using information and facts. In

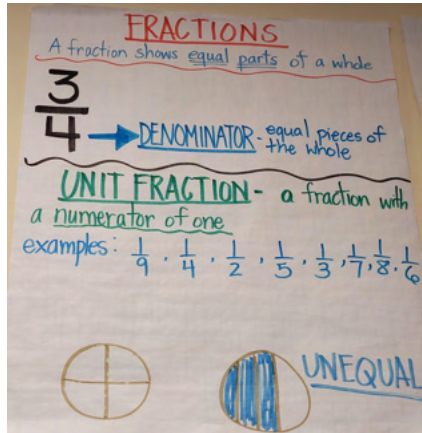

Social Studies, we have moved into the study of our world around us. We will learn about landforms, how to read a map, ways to use natural resources, and the important roles we play in our world!

## Mrs. Cruz Betesh and Mrs. Houston

Dear Third Grade Families,

Your children are recognizing fractions found all around us, and are learning that fractions are equal parts of a whole, of a set, or of a length. They are also learning to name fractions, and to locate fractions on a number line. Seeing fractions on a number line will help your children enhance their number sense. Working

with fractions on a number line also will serve as a basis for future work with fractions in measuring length.

Here is an activity that you and your children can do together.

### Fractions on a Number Line

**Materials** paper and pencil

Write the following fractions on eight slips of paper:

$\frac{1}{8}$     $\frac{2}{8}$     $\frac{3}{8}$     $\frac{4}{8}$     $\frac{5}{8}$     $\frac{6}{8}$     $\frac{7}{8}$     $\frac{8}{8}$

Put the slips of paper in a bag or box and mix them. Have your child draw two slips of paper and write each fraction in the correct position on the number line below.

Continue with the remaining slips of paper.
