Ms. A. Lane

This month, in Ms.Lane's class, we have been exploring fall themes, such as pumpkins, apples, leaves, and acorns. We have also been exploring the various parts of each item, and identifying them. In Science, we made sensory shaped fall trees, where we labeled various shapes, and pasted

them on the tree. In Literacy, we have been learning about our vowels, and that they have two sounds, not just one. October has been filled with fun-filled learning autumn activities!

VOWEL SOUNDS				
LONG & SHORT VOWELS				
SHORT a  apple	SHORT e  elephant	SHORT i  ice cream	SHORT o  octopus	SHORT u  umbrella
LONG ai  rain	LONG ee  bee	LONG ii  kite	LONG oo  boat	LONG uu  moon

Ms. Bartnicki, Ms. Garcia, and Ms. Husti

Happy October! This is a super exciting month in Preschool. This month so far, we have been exploring Christopher Columbus, the letter Bb, the number two, and learning all about respect. We've been doing different crafts to celebrate it all. Coming up, our themes this month are fall, Halloween, the letters Cc and Dd, as well as the numbers three and four, in Math. We will be doing all sorts of fun activities, crafts, and songs for them. This week is Fire Prevention Week! We will be visiting a fire truck, and meeting some awesome firemen. We can not wait!

Ms. K. Lane, Ms. Sinclair, and Ms. J. Jackson

Can you believe we are already in October? We have been having so much fun in Kindergarten, and every student has been working so hard! For Science, we just finished up our apple unit, and are now beginning our leaf unit! Together we continue to work on taking turns, and learning in centers! In Phonics, we are working on identifying letters, sounds, and how to write

each letter! In Reading we are beginning our "Letters at Work" unit. In Math, we are counting and writing numbers 0-5. In Social Studies, we are learning about community helpers! We are excited for all of our new upcoming activities!

Mr. Alkhazov

The students have been working hard, sharpening their Math and Reading skills, this past week. They have also been working hard on their Art assignments. Meanwhile in Science, the boys have had a blast learning about the Scientific Method, and conducting experiments!

The Scientific Method
Observation / Question Topic for research and experimentation or question that needs to be answered
Research Find out about the topic.
Hypothesis Predict the outcome to the problem.
Experiment Develop a procedure to test the hypothesis.
Collect Data Record the results of the experiment.
Analysis Examine the data.
Conclusion Compare the hypothesis to the experiment results.

Mrs. Bush

We have already been learning all about pumpkins this October! Jack-O-Lanterns have taught us all about emotions! We can't wait to carve our own pumpkin. Our reading groups are in full swing. We are learning so many sight words and word families.

Mrs. Capazzi

Numbers: 0-5

Mrs. Capazzi's younger students are learning about the alphabet and numbers. They are learning to read, make, count, write, and compare numbers 0 to 5. Our older students are doing a great job working on reading and writing short vowel words. They are also learning five new sight words a week! In Math, they have been working on developing their addition and subtraction skills.

All students enjoyed learning about Christopher Columbus this month! Have a great weekend!

Ms. Manzo and Mrs. Olivieri

The Second Grade is nothing short of special, with every day being a new adventure. In previous weeks, the students were able to participate in the Week of Respect, and Fire

Prevention activities. These activities provided the extraordinary opportunity for everyone in our schools to become more educated on these topics, in an effort to advance and strengthen our community.

In the coming weeks, we will continue to work on strengthening Reading skills, including summarizing a story, visualizing, and making inferences using details from each book. Furthermore, we will assist the students in different types of writing strategies, in which students will begin to expand their knowledge in journal writing and

narrative-focused pieces. Moreover, each child will have the unique opportunity to choose a narrative to build upon, expand, edit, and publish.

In Math, we will be completing Topic 2, which focused on even and odd numbers, as well as making arrays. Topic 3 will have a major focus on addition within 100, where all the students will be learning the different strategies that can be used.

We have completed our initial Social Studies concepts on people and communities, and have moved into Science instruction of seasons and weather. The students are very excited to be working on several

projects involving an all time favorite, the Water Cycle, as well as an opportunity for each student to

showcase their art skills in creating seasonal posters. As the seasons continue to change, we look forward to watching the new weather come in, the pretty fall leaves come down, and we even have an experiment planned where we research rainfall! There is so much to look forward to! Have a great weekend.

Mrs. Cruz Betesh, Mrs. Houston, and Ms. Schupak

The Third Graders earned their entrance into Superhero Academy this month. After revealing our alter ego names and creating our logos, we decorated capes to wear on

Fridays. This year's super powers will include the power of yet, and the power of mindfulness. We have special hand signals, super handshakes, and we have learned our teacher's

superpowers. The superheroes have finished reading books on the unit of kindness and family generations, and are now reading about animals in nonfiction books. A WONDERFUL YEAR OF AMAZING ADVENTURES AWAITS, AND WE KNOW THAT THESE STUDENTS ARE UP TO THE CHALLENGE!

Ms. Domke and Mrs. Morrison

Our students are off to a great start. September was a busy month of reviewing old concepts, and getting to know each other. We loved hearing about all of the summer adventures. We are looking forward to a great year of fun, and learning new concepts!

In ELA, we have been working on guided reading, story elements, reading strategies, grammar, sentence structure, and writing narratives. Students have been engaged in a variety of lessons, as well as group discussions. Our most recent project is our haunted house stories, where students are

challenged to use their imagination and descriptive writing skills.

In Math, the students are working on place value, decimals, addition, subtraction, multiplication, and division. Students are using IXL, Quizizz, Prodigy Math, Kahoot!, and Blooket to assist in learning. The students have been working hard to master their skills. We are so proud of them, and all of their hard work! 😊

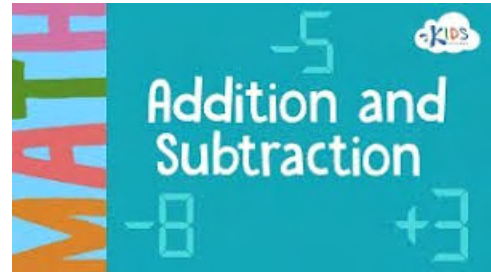

Mrs. Davis and Ms. Rapp

The First Graders have been working on identifying the characters and setting in a story. We are also continuing to review our short vowel sounds. The children wrote about their favorite activities in the fall. They are working on identifying parts of a sentence (naming and telling part). In Math, we just started Topic 2, which focuses on addition and subtraction strategies, such as doubles, near doubles, counting on, and counting back. The firefighters came to

discuss fire prevention. The children enjoyed the assembly, and the visit to the firetruck.
