Upcoming Events:

May 26th-29th - No School - Memorial Day Recess

Ms. A. Lane

Ms. Lane's kiddoes have been flying by this year! We finished our review of alphabet letters and have now moved on to alphabet blends! In Math, we've reviewed small group addition and subtraction and are now identifying three-dimensional shapes. In Science, we are learning about butterflies and their parts. It has been a very fun-filled time learning and growing in our class this month!

Ms. Bartnicki, Ms. Garcia, and Ms. Husti

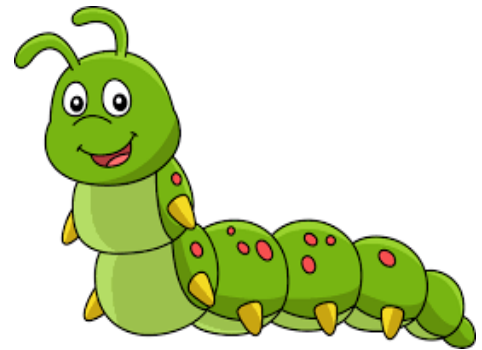

These past weeks in Pre-K, we have been working on the letters S & T, along with a number review, with a main focus on sixteen and seventeen. We've also been celebrating Earth Day and Arbor Day by learning more about the Earth and making a craft. We also did other fun related activities. Soon, we will be planting flowers!

Ms. K. Lane, Ms. Sinclair, and Ms. J. Jackson

The Kindergarteners continue to work so hard! In school, we have been comparing fiction and nonfiction texts. Students are also working on CVC words and writing opinion pieces. In Math, we have been working on addition and subtraction, and in Science we are observing our new caterpillar friends. We look forward to

welcoming butterflies in May. Please make sure you are practicing sight words, letter sounds, letter formation, and number formation at home. Finally, thank you for your continued support.

Mrs. Bush

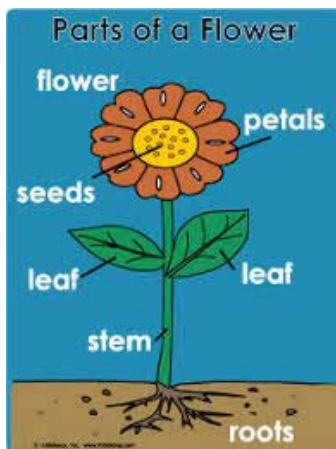

April has been a busy and exciting month! We have learned all about weather in Science. It was a lot of fun learning about different types of clouds and the weather

they bring! Our Reading and Math skills have been growing every day, and we continue to make progress with all our skills! It is also Autism Acceptance Month! Our class enjoyed all of the theme days! We are looking forward to so many fun spring activities coming up soon!

Mrs. Capazzi

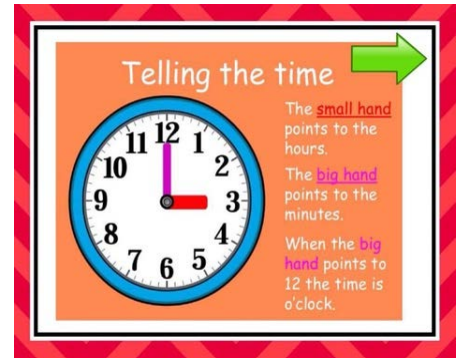

With spring upon us, the students have been learning all about plant life. They are learning the parts of a plant and what plants need to grow. Our students also learned about many different ways to help the Earth in honor of Earth Day. You may even be able to see our projects at the annual Earth Day Fair, on May 20th in town. Congratulations to our First and Second Graders who did an awesome job at the Spring Concert. Have a great weekend!

Mrs. Davis and Ms. Rapp

In Reading, we will be focusing on the next reading skill, which is the summarizing and retelling of a story. We just finished up our unit on opinion writing, and we will be working on narrative writing. In Math, we are on Topic 13, which is on telling time and counting money. The children are excited for the upcoming field trip on May 3rd. We will be seeing *The Ugly Duckling* at the Bergen PAC. We are also looking forward to our Mother's Day Tea on May 12th.

Ms. Manzo and Mrs. Olivieri

Second Grade has been filled with adventure. Several lessons and projects brought the opportunity to explore, investigate, and experiment! We are wrapping up our dinosaur unit with diorama presentations. In addition to our dinosaur unit, the Second Graders have been observing the life cycle of butterflies! Currently, our butterflies are in their chrysalis transition phase. In Math, the students are working on three digit addition and subtraction. They are

expected to solve problems using various methods that include using an open number line, models, place value, and partial sums. In Literacy, we have moved on to character studies, identifying main characters, character traits, and character feelings. Students have also been making predictions, inferencing, and drawing connections. Understanding what characters are doing, how characters are

feeling, and how/why those feelings change throughout a story has been a focus. Opinions have stirred much conversation in Writing, where children are writing letters with strong opinions on homework, providing reasons, explanations, and details. Once their opinion letters are finished, we will be moving on to developing a "How to." In addition to our class studies, students have celebrated Earth Day and performed in their Spring Concert! Congratulations to all of our Lincoln

School students on an amazing job during their Spring Concert and Art Show! It truly is an exciting time in Second Grade!

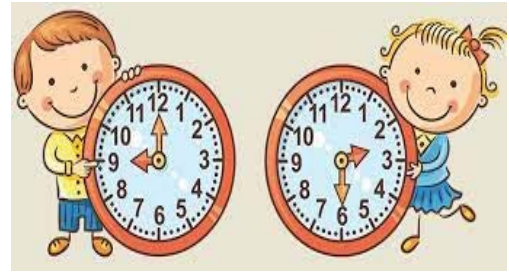

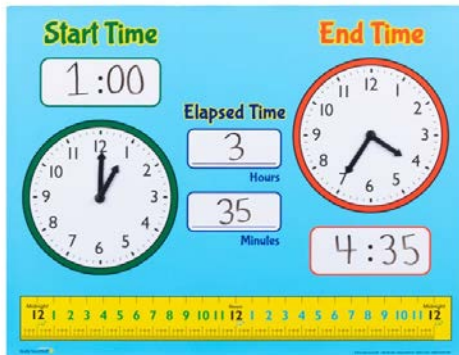

Mrs. Cruz Betesh, Mrs. Houston, and Ms. Schupak

Dear Third Grade Family,

Your children are learning how to use metric units to measure the capacity and mass of objects. They will also learn when it is appropriate to use specific units of measurement for capacity and mass. In addition, your children are learning how to solve problems that involve adding and subtracting time intervals using pictorial models and tools, to build understanding of elapsed time. Use the following activity to enhance your child's understanding of time and elapsed time:

What Time Is It?

Materials: Clock face and number lines.

- Ask your child what time it is right now. Repeat throughout the day for various events, such as the time for breakfast, lunch, and dinner. You may also want to have your child decide on the events for which he or she will record the time.
- Ask your child what time it will be in 30 minutes, 45 minutes, or 60 minutes from a given time. For example, you may tell your child that the family needs to be at the park 45 minutes from the given time. Then ask your child to tell you the time it will be.
- Help your child write and follow a schedule for eating dinner, doing homework, and getting ready for bed. Talk about the length of each activity.
