**NEWSLETTER**  
Week of June 12, 2023

Dr. Stephen Ferraro  
Principal

Phone: (201) 994-1830

## **Upcoming Events:**

**June 21st - Last Day of School for Students**

## **Mrs. Coyle and Ms. Guider**

The students worked so hard this year in Basic Skills, and we are so proud of all of them. We hope you have a wonderful and safe summer. Enjoy some time off, and have some fun, but continue reading and practicing your math facts. IXL and Raz Kids will still

be available over the summer, so please take advantage of them. The town library is another wonderful resource. They have leveled books and lots of fun summer activities as well. Thank

you for all your help and support at home this year!

## Mrs. Davidson, Ms. Haystrand, Mrs. McKenna, and Ms. Graves

We can't believe it's June and there are only a few days left of school! This month, we got to run a Special Ed. Field Day with the Speech Therapists. The children had tons of fun at each station. They rode on scooters, walked on a curvy balance beam, practiced jumping forward and down, and tossed beanbags. They worked hard on a mini obstacle course, rolling up a ramp and climbing down. We also had a coloring station, and the students got popcorn on the way out! We want to thank the safety patrol students who helped us out.

## Ms. Molina

¡Hola a todos! - Hello to all! Kindergarten students are having fun learning the names of different parts of the body and playing "Simón dice..." (Simon says...) to practice the vocabulary. The First Grade students have been introduced to the names of several classroom objects. Second Grade students know a few action verbs, but have been introduced to several more and are enjoying playing games to practice them. The Third Grade students are

learning a bit about Central America, particularly Mexico. Finally, I would like to wish every student and their family a happy and fun summer! ¡Hasta luego!

## Ms. Jaworowski

The final weeks of the school year have been busier than usual in Art class. Kindergarten students took a short break from working on their Eric Carle-inspired "Mixed-up Chameleon" to

do a special project to help decorate for their graduation ceremony. They "painted" watercolor butterflies using a baggie, markers, and a spray water bottle instead of using a traditional set of watercolor paints. The students had fun with this technique and the results were spectacular! The First Grade learned how to blend primary color

oil pastels to make secondary colors on their mixed-up chameleon. They drew and colored a leafy rainforest

background to give their chameleons a natural environment. Kindergarten students also managed to finish up their chameleon project as well. The final art project of the year for Kindergarten and First Grade is

learning how to draw sunflowers, like Vincent van Gogh. What a great way to kick off the summer! Pre-K students and students in Ms. Cioffi's and Ms. Husti's classes created bird kites to symbolize freedom, using colors of the Pan African flag in celebration of Juneteenth. Students from Ms. Lane's class and Ms. Bush's

class made red, white and blue bird ornaments to show their patriotism. Once they finished coloring their Romero Britto patterned dogs, the Second, Third, and Fourth Grade students

began work on self-portraits, using a block style of drawing to show what they would look like if they were Lego characters.

Students in Mr. A's class also drew Lego self-portraits. Meanwhile, Fifth and Sixth Graders are putting finishing touches on their realistic, head and shoulder selfies, on an iPhone template, to show their understanding of facial proportions. Early finishers will re-interpret themselves as a Keith Haring figure jumping for joy, as the 2022-2023 school year draws to a close.

## Ms. Fares

At Lincoln School, the Kindergarten through 3rd Grade Technology students are sharpening their Math skills. Using the website [mathgames.com](http://mathgames.com), we worked on grade level

skills that we were familiar with and skills that we wanted to learn more about. Then, we were able to choose some Math games to work on. The students can always go back to this website to practice their skills. [Mathgames.com](http://mathgames.com) gives a large selection of activities for each grade. We are seeing that Math can

be fun! The students also took time to do some coding with various age appropriate robots. The 4th through 6th Graders created class trip

scavenger hunts. They will have the opportunity to try out their classmates' scavenger hunts, and learn about many different fun locations throughout the world!

Have a safe and fun summer!

## Mrs. Salvatore

Mrs. Salvatore's Kindergarten class finished their alphabet books, with colorful illustrations for each letter, along with letter vocabulary. Hopefully, they will share their books with their families. They are now learning color words, number words, and sight words. Grade 1 is almost finished with our Phonics and Reading Comprehension books. 2nd to 6th Grade classes are finishing up several interesting units. We learned so many facts about snakes, sharks, and whales! Did you know that a long snake can have up to 300-400

pairs of ribs? Or... that thousands of whales are still being killed each year? Ask your children about all of the interesting information they learned this month.

Please have your children visit the town library over the summer. There are many audio books available to help them with vocabulary, pronunciation, comprehension, and listening skills. Have a fun, safe summer!

## Mrs. Morris

Kindergarten and First Grade students enjoyed learning about and exploring with sand and seashells this week. Grade 2 students finished their year being introduced to the Engineering Design Process. We enjoyed the story *Rosie Revere Engineer*, by

Andrea Beatty and learned about the contributions of real life engineers! Third Grade pull-out classes are completing their Tiny House Unit. Students are studying how to draw from different perspectives, as well as learning/reinforcing the concepts of perimeter and area. Grade 4 students are ending the year learning about and educating each other about famous artists

and their works. Fifth Grade G & T students are finishing up the year completing logic puzzles and fun building challenges! Finally, the 6th Grade students finished building and testing their catapults, they did a fantastic job! It's hard to believe that summer is upon us. I would like to wish all of my students a healthy and happy summer filled with many adventures!

## Ms. Domke and Mrs. Morrison

Our students have continued to work hard and challenge themselves to be the best they can be. We have loved watching them grow and develop both socially and academically. The students are actively participating in lessons and discussions which is contributing to a positive learning environment. In ELA, we worked on novel studies for reading, story elements, reading strategies, grammar, sentence structure, and developing our writing. Students have been engaged in a variety of lessons as well as group

discussions. Our students have completed many books this year, as a class, such as the *Junie B. Jones* series, the *My Weird School* series, *Nancy Drew*, books by Andrew Clements, and many more! As a final project, the students are watching the film of one of the novels we read, and they are comparing and contrasting the two versions of the story. In Math, the students are working on volume, algebraic expressions, place value, tally marks, understanding time and money, 3-D shapes, graphing, and problem solving. Students are using IXL, Quizizz, Prodigy Math, Kahoot!, and Blooket to assist in learning. They are enjoying

playing various games which help concept mastery. The students have been working hard in their daily lessons. We are so proud of them and all of their hard work! We've had a great school year and look forward to September. We hope everyone has a safe and fun summer!

## Ms. Conticello and Ms. Elborki

We are so excited for summer in Speech! Our Preschool and lower grades have been working on labeling summer vocabulary words (i.e., beach, pool, sand) to get us ready to talk to our friends and family about summer activities! They are also working on taking turns

so that their play skills will continue to grow throughout the summer! Our older students have been working on their speech sounds and auditory comprehension, to expand our receptive and expressive language skills in the classroom. Have an amazing summer!

## Mr. Fells and Mr. Mazzarisi

Ending out this wonderful year in style; Physical Education classes re-visited some of the “Top-10” favorite activities from throughout the school year. Some favorites included “Over-Under,” “The Pacer Test,” “Pac-Man Tag,” and “Home Alone!” Mr. Fells and Mr. Mazz hope everyone has a safe, happy, and relaxing summer!!!
