Upcoming Events:

November 22nd - 1:00pm Dismissal

**November 23rd-24th - No School - Thanksgiving
Recess**

Ms. A. Lane

It has been a very busy month in Ms. Lane's room! We have been learning a lot about the season of fall. We have been making fall festive arts and crafts, such as fall trees, leaves, and acorns. We have been learning about the letters I, L, and K in our Literacy centers. We also have been

learning about the numbers 6 through 10 in Math. It's been a very fun-filled month!

Ms. Bartnicki, Ms. Garcia, and Ms. Husti

This month in Pre-K, we have had a lot of fun! We celebrated Ms. Bartnicki's birthday, and then prepared for our two other friends' birthdays this month. We started learning about Thanksgiving and thinking about what we are thankful for. We

also started doing the Star of the Week in our classroom, where students can showcase more about themselves by bringing in a poster, book, and toy to share. We're learning the letters D - G and numbers 4 - 7. We can't wait to see what comes next, Gobble, Gobble!

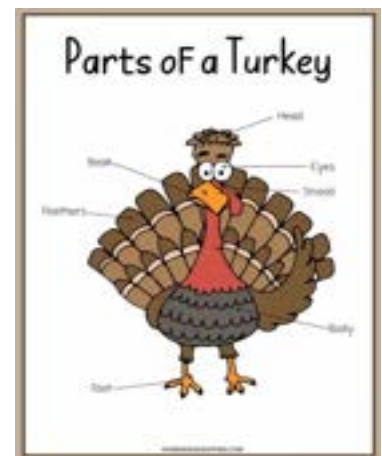

Mrs. Bush

Happy November! We are thankful for our wonderful class and the friendships blossoming this school year! We have been busy in our Reading and Math centers as we continue to learn new skills and work on the skills we learned. We have been learning about Thanksgiving in

Social Studies and the life cycle and parts of a turkey in Science. We have also been enjoying the fall weather and getting outside to play! We hope everyone has a wonderful Thanksgiving!

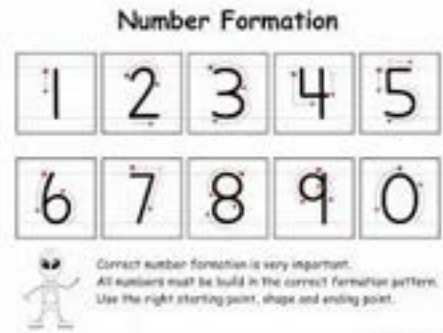

Ms. K. Lane, Ms. Sinclair, and Ms. Jackson

Can you believe we are already in the middle of November? We have been having so much fun in Kindergarten for the past three months, and our Kindergarteners have been working so hard! We just finished up our leaf unit and disguised our turkeys so they do not get eaten on Thanksgiving! We are also becoming readers and writers. Please make sure you are practicing sight words, letter sounds, letter formation, and number formation at home. In Math, we have been working on forming our numbers and counting

using ten frames. Finally, thank you for all of your patience and support so far this year. It has been greatly appreciated!

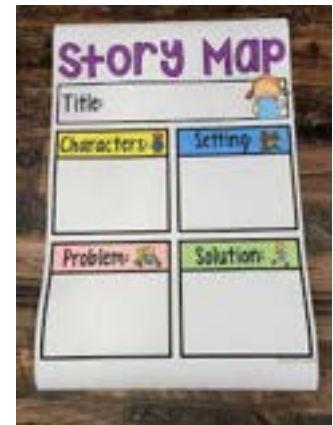

Ms. C. Morrison, Ms. J. Rapp, and Ms. Gorgone

In First Grade, the students are working on completing character, setting, problem, and solution story maps. In Math, we are working on using subtraction strategies to subtract. Students discussed

what a veteran is and how we can celebrate Veterans' Day. Our Social Emotional Learning theme for this month is gratitude. We discussed what we are thankful for. The High School mentors came to help us express our gratitude by showing us how to write notes to our loved ones. Continue to read and practice sight words each night with your child.

Ms. Manzo and Mrs. Olivieri

The Second Graders are working on various topics in Reading that include reading realistic and fantasy fiction text. Students are also making predictions and drawing connections to themselves and other books. Our new

Math topic focuses on adding within 100 using strategies requiring strong number sense.

We are taking a trip into the past in Social

Studies, recognizing key sequential events that mark our nation's past correlating with upcoming holidays. Such topics link cross curricular connections so students develop deeper understandings and conceptualizations. We will also continue to practice "good writing qualities" focused

around content, elaboration, structure, and voice.

Please be sure to check our Google Classroom for important reminders, updates, and additional resources that relate to class activities or school events. In addition, please continue to work on building math fact automaticity at home using math fact strategies to better support student learning. Have a wonderful weekend!

Mrs. Capazzi

Mrs. Capazzi's students continue to work diligently on a daily basis to develop their Math and Language Arts skills. We are so proud of their efforts and accomplishments. The students enjoyed learning about the first Thanksgiving and sharing and writing about what they are thankful for. We all

have so much to be thankful for this holiday season. Enjoy the weekend!

Mrs. Cruz Betesh and Mrs. Houston

The Third Grade is learning about area. In addition to learning about the area of simple rectangular shapes, they will also learn how to find the area of irregular shapes. We will use both nonstandard and standard units to calculate area with and without grid paper. We have learned how to multiply with factors 1, 2, 5, 9, and 10. Please continue to practice multiplication facts daily.
